

Features of the Hayward® Navigator® automatic in-ground cleaner:

- Exclusive SmartDrive® automatic steering cleans your pool faster and better than random cleaners
- Vacuums microscopic dust and pollen up to large debris
- Uses existing filter system — no need for additional equipment
- Quiet, trouble-free operation — no need to empty or replace bags
- Easy installation — no tools required

2 Year
LIMITED WARRANTY

Accessories

The optional Leaf Canister interconnects in-line, trapping leaves and debris before reaching your pool's filter system. Its see-through design lets you know when to empty.

The optional Skimmer Vacuum Plate automatically alternates between vacuuming the pool and skimming the pool's surface with each cycle of the filtration system's time clock.

HAYWARD Pool Products
One source. Every pool.

An intelligent clean every time with SmartDrive® technology.

 The exclusive, patented SmartDrive® automatic steering system does what random cleaners can't – systematically clean your pool, quickly and efficiently. It has the proven ability to cover your entire pool surface for a comprehensive and complete clean. And now, SmartDrive is even better with a lengthened straight driving time so it goes further between rotations, making it easier to get up steep inclines or up walls.

Better features for a better clean.

The Navigator® vacuums large debris while it covers your entire pool. From microscopic dust and pollen to large leaves and twigs, the Navigator handles it all. The front bumper has been curved to allow faster push-off from walls so it can spend more time cleaning.

Increased wingspan.

Navigator model 925C for concrete pools.

Navigator model 925V for vinyl-liner pools.

Your pool, made better with the Navigator.

The Navigator from Hayward gives you easy, trouble-free operation. And because it's powered by your existing filtration system, you don't have the expense of an energy-consuming booster pump. And you won't waste time emptying or replacing debris bags. Getting that sparkling clean pool is easy and effortless with the Navigator. And when you install your new Navigator as part of the Totally Hayward™ System, you get the assurance of knowing you have a complete system, designed to work together for the best operation and the cleanest, clearest water possible.
